SCD™ series

SCD mini™ series

- Extended battery life
- Two way communication
- Wide operating temperature span
- Shock proof protective rubber enclosure

SPEED TECH A/S

🔧 INTRODUCTION & BATTERY REPLACEMENT

The Hand Remote™ is a wireless remote control developed for the purpose of controlling industrial doors and gates. Special attention has been made regarding current consumption which makes this remote control last very long in between battery replacements.

Because Hand Remote™ is sold without batteries a new set will be required prior to pairing and use.

To insert new batteries remove the blue protective rubber cover, then open the battery lid as shown below.

Close the lid, install the protective boot and go to...
